

Wiring Ducts & DIN Rails

Five Important Reasons to Choose Shamrock Trunkie Wiring Ducts

1. Ergonomically designed wiring ducts covers are easily mounted and dismantled
2. Upper scoreline provides easy breaking off the ribs as a result of 90 bending.
3. Lower score line provides easy splitting of wiring duct base and wall.
4. Bottom rail provides easy mounting of wiring duct accessories inside the duct.
5. Special rib pattern design allows more proper wire placement.

Practical (dis) assembly of the duct covers

(Dis) Assembly of the covers is the most difficult operation when the duct is fully wired. Design of Trunkie speeds up your work and makes (dis) assembly of the cover easier.

Durable and Reliable

Trunkie enables the end-user to use the maximum inner space of the duct and keeps its rigidity even at this maximum load of cables.

Speed and Efficiency

Without using any hand tools you can bend the duct ribs up to 90 degrees angle and easily break them off inside of the panel. Furthermore Trunkie helps you to save time while you break off a group of ribs.

The Solutions, which Ease Wiring

Now wire management is much easier. You can easily mount wire retainers on the bottom rail of the duct, and slide them on the bottom rail.

Appearance

Special rib pattern allows the end-user to make cable grouping even on the entry level.

PRODUCT CHARACTERISTICS

- Operating temperature range -15°C...60°C
- Standard length 2 meters
- Standard color RAL 7030 grey
- In compliance with RoHS directive
- In compliance with IEC 60695-2-1 and EN 50085-2-3 standards
- Certificates : VDE, UL, CE and GOST
- Wide product range
